A Successful Long Term Partnership

Technosys is a global provider of Enterprise Management Solutions specialising in the BMC portfolio of products for Business Service Management (BSM). Our ethos is to deliver solutions based on 'Quality', ITIL processes and established 'Best of Breed' products.

Technosys Resource Management (TRM)

Technosys Resource Management (TRM) focuses on all aspects of temporary and contract recruitments for BMC Software. TRM has the objective of providing professional bespoke services, efficient IT Service Management and BMC Software Portfolio professionals to the Service Management industry.

The TRM division is completely focused on finding the best possible candidates for the BMC work/project at hand. TRM can deliver well against resource shortfalls in particular BMC/Remedy skills.

Purpose

To enable organisations to supplement their in-house BMC Software resourcing capability and capacity. To provide a dedicated BMC Software only resource management service.

Technosys Advantage

Our Resource Bank currently consists of, circa 200+ quality BMC/Remedy skilled technical consultants EMEA wide and is growing

We have provided resources to BMC, BMC Partners and BMC Customers in the UK and overseas for over six years.

As we have our own consultants with specialist BMC skills, we can quickly identify your resourcing requirement and apply our experience to find the most suited candidates.

We endeavour to provide technical resource for most of the products in the BMC portfolio and only deal with resourcing for BMC Software.

All our candidates have a pre-screened in-depth BMC specific interview which means that we will only put forward to you highly skilled BMC professionals.

About Us

We pride ourselves on people management and client service, with professionalism and exceptional value given to every client and candidate alike.

We are dedicated to providing a service which is second to none. TRM has the depth of experience to meet and exceed your BMC resourcing needs. We are keen to demonstrate our capabilities with any existing or future requirements.
